WHAT IS CRYPTO CURRENCY ?

Cryptocurrency, often referred to as "crypto," is a type of digital or virtual currency that uses cryptography for security. Unlike traditional currencies issued by governments (like the US dollar or the euro), cryptocurrencies operate on a decentralized system based on blockchain technology. This decentralization means they are not controlled by any central authority, such as a government or financial institution.

Decentralization: Most cryptocurrencies are decentralized and operate on distributed ledger technology, usually a blockchain, which is a chain of blocks, each containing transaction data.

Security: Cryptocurrencies use cryptographic techniques to secure transactions, control the creation of new units, and verify the Transfer of assets.
